Profile

A prospective student looking to apply for a tech job role for a junior position in software engineering. I have a growing desire to gain more opportunities and further skill development. I am a hard-working and sociable person who can get on well with other people; with the ability to communicate and collaborate effectively as a team member. I am also an honest and determined person, who is always proactive, persistent and productive. My expectations are high, and I will always try to perform to the most excellent standard.

Qualification

Hyperion Dev Bootcamp - Nov 14 - Feb 21 2023

This bootcamp has taught me a range of skills and I have completed the bootcamp. Currently, tech jobs are in high demand and there is a market of jobs available in the market. The main programming language currently being taught is python.

Relevant coding Skills:

- Python
- SQL and databases
- HTML
- CSS styling
- Django
- Bootstrap

University of Southampton 2019 - June 2023

BSc Biomedical Science = Predicted 2:1

Anglia Ruskin University 2017-2018

Foundation year = Achieved overall 70% mark for all modules on the transcript.

Morpeth School 2014 - 2016

- GCSE English Language = B   - GCSE Media Studies = B   - GCSE Science = A
- GCSE English Literature = B   - GCSE Geography = B
- GCSE Mathematics = A   - GCSE ICT = A
- AS-level Mathematics = C   - GCSE Religious Studies = A
- AS-level Economics = D   - GCSE French = B
- A-level Biology = E   - GCSE Psychology = B
- A-level Chemistry = E   - GCSE Economics = B
- GCSE Additional Science = A
- GCSE Further Additional Science = A*

Career summary

<u>Enactus Southampton Society - 2019</u>

There was an interest to see how a social enterprise, such as Enactus, can help to tackle real world problems. I had gained a unique experience working with people. The Charge project was about finding innovative ways to tackle the street and house lighting problems within the rural Char regions of Bangladesh, which are mainly affected by flooding. Being at Enactus allowed me to shadow the different roles within a real-life project and gave me a broader insight on future job opportunities. I had attended regular meetings. Contributed ideas to the website design for the Charge project with the help of a website designer. Participated in group activities and strengthened team bonding skills. Supervised by senior students. As a group we came up with the idea for developing our own batteries and installing those batteries on boats, which then deliver the mobile batteries to the local people that live in remote regions. As a result, this would increase night-time productivity because of lamps powered by these portable batteries. Discussed further opportunities and marketing during the meetings. For example, thinking about our group project logo design and t-shirts to improve brand awareness.

Volunteer Ward Helper - Addenbrooke's Hospital (11 Jan 2018 - 31 May 2018)

- 40 hours of volunteering
- Helped out the NHS catering service offering nutritious meals to hospital patients in wards.
- Listened and talked with patients. Made sure that the patients were happy by smiling at the patients and making them feel appreciated.
